

Turbo Drill Industries is a leading manufacturer and supplier of high-performance drilling products and services supporting operations throughout North America. We are driven by our customer's needs and are continuously developing and improving drilling products that exceed industry expectations.

We are looking for an experienced Maintenance Millwright to join our team in Conroe, TX. The Industrial Maintenance Millwright is a full-time position, responsible for installing, inspecting, adjusting, and repairing equipment while following safety rules and regulations. You will be required to maintain all equipment to required standards and be responsive to production needs and equipment failures.

MAINTENANCE MILLWRIGHT

Essential Duties and Responsibilities

- Keeping detailed and accurate maintenance reports and documentation on computer or manually such as work orders, equipment inspections sheets, lock-tag-verify audit sheets, lock box systems, etc.
- Troubleshooting, installing aligning, dismantling industrial machinery and mechanical equipment, and metal working machine tools.
- Performing periodic maintenance routines on equipment to achieve optimal performance, HVAC experience a plus.
- Working with operations associates to identify and prioritize maintenance needs.
- Adhering to all plant safety and environmental guidelines, policies and procedures and actively participate in the safety program.

Qualifications & Requirements

- A minimum of 5 (five) years maintenance experience as a millwright, welder or structural repairman in a manufacturing setting OR industrial military experience.
- Experience troubleshooting issues with bearings, chains, sprockets, gearboxes and conveyors.
- Experience installing, troubleshooting, and repairing equipment in a manufacturing environment.
- Review and follow highly technical and complex machinery manuals, diagrams and schematic drawings to determine work procedures.
- Experience with metal fabrication (cutting, welding, machining, etc.).
- Must have experience troubleshooting hydraulic equipment, circuits, and components.
- Must have experience troubleshooting electrical controls, PLC's, A/C and D/C motors, motor controllers and drives.
- Proficiency using computer for record-keeping and documentation functions.
- Willing to work a flexible schedule which might include nights, overtime, weekends and holidays.
- Able to lift up to 50lbs.
